

GUIDE TO POSTERS

We offer three types of poster – either with a pre-printed message which we call a **Message Poster**, one that can be customised with your own text, which we call a **Blank** or **Publicity Poster**, or one that has one line only for customisation for your church's website address, which we call an **SP Poster**.

MESSAGE POSTERS

Message posters are eye catching and tend to have a simple Christian message. They are designed either to communicate with people in church to encourage praise, thanksgiving and worship, or with those outside of the church, encouraging them to think more about their own spiritual journey. Our message posters come in a range of different sizes and finishes – please see the box below for further details.

PUBLICITY POSTERS

Publicity posters are designed for you to personalise with your own details. They are specially designed with plenty of space for you to add your own text using our online overprint system. They are ideal for communicating your services and events. Our blank posters come in a range of different sizes and finishes – please see the box below for further details.

GUIDE TO BANNERS

BE BOLD!

Large format banners can really make the most of your building – whether you use them for branding and reinforcing your identity, or making a community impact and attracting attention outside.

Many of our colourful and vibrant banners are used internally by churches to encourage praise, thanksgiving and worship.

BENEFITS OF CPO'S THREE VINYL BANNER FINISHES

Vinyl Clipped Banner

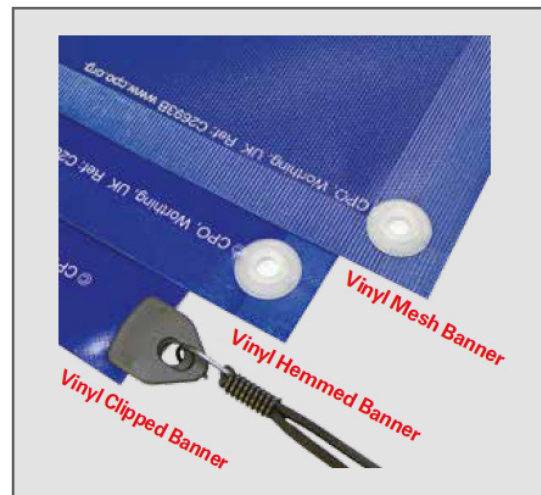

The ideal solution for most applications. Made of strong but lightweight material, it offers affordable and cost effective outreach. The clips and elasticated cords give greater flexibility for mounting and pulls taut for maximum effect.

Vinyl Hemmed Banner

Made from the same vinyl, this is a top quality premium product, traditionally finished, with hems and eyelets.

Vinyl Mesh Banner

A top quality, lightweight solution. This perforated vinyl banner is ideal for windy conditions (e.g scaffolding). Often used for stage backdrops. Traditionally finished with hems and eyelets.
